

LA BLANCHE ELEGANCE

HOUWELING

“Will give the sun no chance”

After a few years of testing we have successfully brought a new shading material into the market, namely: La Blanche Elegance.

La Blanche Elegance is a new shading material which consists of completely environmental friendly components.

La Blanche Elegance is a shading material with an excellent shading force.

La Blanche Elegance can be used on glass or foil. The product must be sprayed on a dry surface.

You can bring La Blanche Elegance on the glass in different dosages, so you can choose the shading force that you wish.

A dilution of 1 part La Blanche Elegance to 2 parts water provides a shading which is normally resistant enough for one season. Naturally it depends on the atmospheric circumstances.

With the light measurements listed below, we can reveal the excellent shading force of La Blanche Elegance.

Dilution	Shading Force dry	Shading Force wet
1 at 2	36%	18 %
1 at 3	31%	16 %
1 at 4	24%	11 %
1 at 5	19%	9 %
Standard 1 at 2	32%	14 %

At the end of the season, it is possible to remove easily La Blanche Elegance with La Blanche Brilliance.

La Blanche Brilliance is not harmful for glass and foil. You have to bring on La Blanche Brilliance under dry circumstances; the following rain shower will be enough to rinse the greenhouse.

Packaging units:

La Blanche Elegance will be supplied in a 20 liters buckets.

La Blanche Brilliance will be supplied in a 20 liters jerrycans.
